**HOME & GARDEN TELEVISION SELECTS & AIRS AQUARIUS LASER AS A  
“HOT NEW PRODUCT” FROM THE 04 INTERNATIONAL BUILDERS’ SHOW**

Woodland, CA, (April 12, 2004) – Home & Garden Television (HGTV), will be airing a thirty minute special, Sunday, April 18<sup>th</sup> at 7:00 pm, featuring Aquarius Laser Etching and Design along with the other hottest new products selected at the 2004 International Builders’ Show held last January in Las Vegas, NV..

This half hour program will take a look at how Aquarius Laser is able to produce artwork like never before thought. “Aquarius laser is able to produce beautiful full color artwork etched into granite stone, so liven up your kitchen backsplash, interior walls and floors with custom imagery,” says the show host.

The program will touch upon what HGTV producers thought were the most useful, beautiful and new products on display at the largest building industry in the nation. Catching the eye of producer Jean Connelly was first the 8’x10’ granite painted wall mural, along with an 8’x9’ granite etched floor. “The fact that people can have an image of their desire on such a durable stone created at any size is fantastic,” said Connelly. The HGTV segment also looks at the range in size available, showing photo etchings as small as 6”x6” and as large as an install space permits.

The program will be aired six times over the next three months; air dates are yet to be determined. Also featured on the episode are products such as S-curved sliding glass doors by Panda Windows & Doors, Direct-vent gas fireplaces by Doverra with hidden control panels, and much more.
